PROFESSIONAL OVERVIEW

Motivated and detail-oriented Computer Science Engineering graduate with hands-on experience in Java, SQL, web development. Skilled in problem-solving, logical thinking, and building practical software solutions. Strong understanding of core CS fundamentals including Data Structures, Algorithms, Operating Systems, and OOP concepts. A quick learner with the ability to adapt to new technologies and work effectively in team environments. Eager to contribute technical and analytical skills to a dynamic organizational role.

TECHNICAL SKILLS & COURSEWORK

Languages: Java-8, JavaScript, SQL, Data Structures & Algorithms, OOPs, Exception Handling, Collection Framework, JDBC, Servlet, JSP, Hibernate, Spring, SpringBoot

Tools: VS Code, Eclipse, IntelliJ IDEA

Technologies: Windows, Linux, HTML, CSS, BootStrap, Web Development, RDBMS

PROJECTS

Image Caption Generation using CNN & LSTM

06/2023

CNN, LSTM

Overview: This project focuses on generating automatic captions for images using deep learning. A Convolutional Neural Network (CNN) extracts visual features from the image, while a Long Short-Term Memory (LSTM) model converts these features into meaningful text descriptions. The system is trained on paired image-caption datasets to learn visual patterns and language context. It enhances accessibility by generating textual descriptions and can be used for search, tagging, and automated annotation. This project demonstrates practical experience with neural networks, dataset preprocessing, and model training.

College Management System (Servlets + JDBC + PostgreSQL)

11/2025

Java, Servlets, JDBC, PostgreSQL, HTML, CSS

Overview: Built a web-based college management system to manage students, departments, and course information. Developed using Java Servlets for backend processing with JDBC for secure database communication. Designed relational schema in PostgreSQL and implemented full CRUD functionalities with server-side form validation, MVC structure, and proper exception handling to ensure smooth and reliable operations.

INTERNSHIP

USHA Martin Pvt. Ltd — SAP (PP Module) Training

01/2023–02/2023

Overview: During this internship, I received hands-on training in the SAP Production Planning (PP) module. I learned processes such as material requirement planning (MRP), capacity planning, and production order management. Worked with industry workflows to understand how SAP supports end-to-end manufacturing operations. Gained practical exposure to ERP systems, inventory control, and production cycle monitoring. This internship strengthened my analytical skills and understanding of industrial production planning.

CERTIFICATIONS

- 30-Days Live Peer Training in C++ Programming
- National Engineering Olympiad
- Engineering Ethics & Soft Skills (NPTEL SWAYAM)

EDUCATION

Durgapur Institute of Advanced Technology and Management

2020–2025

B.Tech in Computer Science & Engineering – **8.02 CGPA**

DAV Nandraj Public School, Ranchi

2018–2020

CBSE XII – **63.60%**

DAV Nandraj Public School, Ranchi

2017–2018

CBSE X – **66.60%**
